<b>General</b>	In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.
<b>Inhalation</b>	Remove to fresh air, keep patient warm and at rest. If breathing is irregular or stopped, give artificial respiration. If unconscious place in the recovery position and obtain immediate medical attention. Give nothing by mouth.
<b>Eyes</b>	Irrigate copiously with clean water for at least 15 minutes, holding the eyelids apart and seek medical attention.
<b>Skin</b>	Remove contaminated clothing. Wash skin thoroughly with soap and water or use a recognized skin cleanser.
<b>Ingestion</b>	If swallowed obtain immediate medical attention. Keep at rest. Do NOT induce vomiting.

### 4.2. Most Important Symptoms And Effects, Both Acute And Delayed

<b>Overview</b>	<p><b>EFFECTS OF OVEREXPOSURE - EYE CONTACT:</b> Liquid, aerosols and vapors of this product are irritating and can cause pain, tearing, reddening and swelling accompanied by a stinging sensation and/or a feeling like that of fine dust in the eyes.</p> <p><b>EFFECTS OF OVEREXPOSURE - SKIN CONTACT:</b> Prolonged or repeated contact can result in defatting and drying of the skin which may result in skin irritation and dermatitis (rash).</p> <p><b>EFFECTS OF OVEREXPOSURE - INHALATION:</b> Harmful if inhaled. Headaches, dizziness, nausea, decreased blood pressure, changes in heart rate and cyanosis may result from over-exposure to vapor or skin exposure. Breathing saturated vapors for a few minutes may be fatal. Saturated vapors can be encountered in confined spaces and/or under conditions of poor ventilation. Prolonged inhalation may be harmful.</p> <p><b>EFFECTS OF OVEREXPOSURE - INGESTION:</b> This material may be harmful or fatal if swallowed.</p> <p><b>EFFECTS OF OVEREXPOSURE - CHRONIC HAZARDS:</b> Overexposure may cause lung damage.</p> <p><b>AGGRAVATED MEDICAL CONDITIONS:</b> Persons with pre-existing skin disorders or impaired liver or kidney function may be more susceptible to the effects of this substance. Alcoholic beverage consumption can enhance the toxic effects of this substance. Chronic fumes from this product may exacerbate asthma.</p>
-----------------	--

Exposure to solvent vapor concentrations from the component solvents in excess of the stated occupational exposure limits may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms include headache, nausea, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness.

Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in dryness, irritation and possible non-allergic contact dermatitis. Solvents may also be absorbed through the skin. Splashes of liquid in the eyes may cause irritation and soreness with possible reversible damage. See Section 2 for further details.

## 5. Fire-Fighting Measures

### 5.1. Extinguishing Media

Dry chemical, foam, water fog.

### 5.2. Special Hazards Arising From The Substance Or Mixture

Hazardous decomposition: Oxides of carbon and nitrogen, low molecular weight hydrocarbons and organic acids. Keep away from heat, sparks, open flames, and hot surfaces - No smoking. Use explosion-proof electrical, ventilating, light, and equipment. Avoid breathing dust, fume, gas, mist, vapors, and spray.

### 5.3. Advice For Firefighters

Above flashpoint, vapor-air mixtures are explosive within flammable limits noted above. Vapors are heavier than air and may travel along the ground to distant ignition sources and flash back. Contact with strong oxidizers may cause a fire. Risk of explosion in closed containers if pressure rises rapidly. May produce a floating fire hazard. Sensitive to static charge. Cool closed containers exposed to fire by spraying them with water. Do not allow run off water and contaminants from fire fighting to enter drains or water ways.

ERG Guide No. 128

## 6. Accidental Release Measures

### 6.1. Personal Precautions, Protective Equipment, And Emergency Procedures

Put on appropriate personal protective equipment (see Section 8).

### 6.2. Environmental Precautions

Do not allow spills to enter drains or watercourses. Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

### 6.3. Methods And Material For Containment And Cleaning Up

Flammable material. Eliminate potential sources of ignition. Wear appropriate respirator and other protective clothing. Use water to keep fire exposed containers cool and disperse vapors. Do not use sawdust. Use non-sparking tools. Place in non-leaking containers and seal tightly for proper disposal. CERCLA requires reporting spills in excess of RQ.

## 7. Handling And Storage

### 7.1. Precautions For Safe Handling

All labeled precautions must be observed when handling, storing and transporting empty containers due to product residues. Do not reuse containers. Triple rinse before disposal. Dispose of in a licensed facility. Recommended crushing or other means to prevent re-use. Store in accordance with the National Fire Protection Association's publication NFPA 30, Flammable and Combustible Liquids Code. 29 CFR 1910.106 applies to the handling, storage, and use of flammable and combustible liquids. See Section 2 for further details [Prevention].

### 7.2. Conditions For Safe Storage, Including Any Incompatibilities

Handle containers carefully to prevent damage and spillage. Incompatible materials: Avoid contact with strong acids and bases. Contact with strong oxidizers may cause fire and explosion. Flammable. Keep away from heat, sparks, and open flame. Store in a cool, dry, well-ventilated area. Keep containers closed. Do not store with incompatible materials, such as oxidizers. Protect from light, including direct sunlight. Ground container and transfer equipment to eliminate static electric sparks. Do not store or consume food, drink, or tobacco where they may become contaminated with this material. Mechanical ventilation or local exhaust may be required. See Section 2 for further details [Storage].

### 7.3. Specific End Use(s)

No data available.

**8.2. Description Of First Aid Measures**

**Respiratory** If workers are exposed to concentrations above the exposure limit they must use the appropriate, certified respirators.

**Eyes** Chemical safety goggles with splash shield.

**Skin** Wear overalls to keep skin contact to a minimum. Impervious gloves are recommended.

**Engineering Controls** Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn.

All electrical equipment should comply with the National Electrical code.

Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower.

**Other Work Practices** If exposure limit is exceeded, a half-face organic vapor respirator may be worn for up to ten times the exposure limit or the maximum use concentration specified. A full-face piece respirator organic vapor respirator may be worn up to 50 times the exposure limit. **WARNING:** Air-purifying respirators for not protect workers in oxygen-deficient atmospheres. Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse. See section 2 for further details [Prevention]
